Video Production An Introductory Short Course

Video Production

This 12 week practical course will give you a broad introduction into the world of video production

You will gain an insight into the working of the media industry and acquire technical skills in video production.

The subjects covered include:

Shot types and camera moves

Shot selection

Editing points and the rules of video editing

Appropriate use of transitions

Superimposition of one image over another

Audio editing

Effects editing

Video Production

On successful completion of this course you will be eligible to progress on to intermediate level and then to advanced level in video production.

For all these media courses you will have access to professional video equipment and the latest industry standard software.

The course will help delegates become familiar with and proficient at non-linear editing using Avid Express Pro, one of the leading video editing packages.

Video Production

These courses are intended for people who have a certain amount of video knowledge but are dissatisfied with the end results. The big difference between amateur and professional videos is the editing, so this course will teach delegates how to edit video.

Cost: £275
