

## Instructions

---

The project is designed to be self led and is delivered through a guided workbook in the form of a powerpoint presentation.

The project will require internet access and the use of basic audio and video recording (for example on a phone)

Students should use the presentation provided to add their work and can insert text directly into the presentation.

The best option would be to upload the presentation to Google and add it to a classroom - this will allow for the presentation to be issued as an assignment with a copy for each.

If using Google Classroom it may be easier to add the link to the Google Slides version directly:

<https://docs.google.com/presentation/d/1WAqgrSCPISzOAKjOXevBQCnd1od5szMgyAY-597nuEU/edit?usp=sharing>

Any questions or problems please feel free to contact me directly:
